

Copyright Assignment Agreement and Statement of Originality

We approve the submission of this manuscript to the “Sociedade Brasileira de Cardiologia” for publication after ensuring the integrity of this work. We confirm that neither the manuscript nor any part of it has been published or is under consideration for publication elsewhere (except for abstracts). Any reference to or use of previously published material protected by copyright is explicitly acknowledged in the manuscript.

If this work was produced for an employer as a “work made for hire”, an authorized representative of that employer must sign on the appropriate line below.

The undersigned hereby assign all rights, including but not limited to the copyright, for the manuscript entitled

-----Manuscript Number____

to the “Sociedade Brasileira de Cardiologia” upon its acceptance for publication (**all** authors must print and sign their names; attach additional pages for signatures if necessary). The rights assigned include, but are not limited to, the sole and exclusive rights to license, sell, subsequently assign, derive, distribute, display, and reproduce this manuscript, in whole or in part, in any format, electronic or otherwise, including those not in existence at the time this agreement was signed. The authors hereby warrant that they have not granted or assigned, and shall not grant or assign, the aforementioned rights to any other person, firm, organization or other entity.

Reuse. Authors are permitted to reuse portions of their SBC-copyrighted work, including tables and figures, in their own work and to reuse portions or all of their SBC-copyrighted work for lecture or classroom purposes or dissertation or thesis requirements, provided that the citation and copyright information is given.

Post-prints. Authors are permitted to submit the final, accepted version of their manuscript to their funding body, or institution for inclusion in their funding body or institution’s database, archive, or repository, or to post the final, accepted version on their personal Web site. These manuscripts may be made freely accessible to the public 6 months after the final publication date.
